DETAILED ACTION

Priority

The certified copies of priority documents have been received in the National Stage Application from the international bureau (PCT Rule 17.2 (a)).

Response to Amendment

The preliminary amendment filed on 4/25/2005 has been considered. Claims 2, 4, 5, 8, 9 -11 and 13 – 17 were amended. Claims 18 – 36 were added. Claims 1 – 36 are currently pending.

Drawings

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the form must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for

of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 3. Claims 1 4, 6 13 are rejected under 35 U.S.C. 102(b) as being anticipated by Browder, Jr. (US 6,276,175). The device of Browder, Jr. discloses a clothing article capable of being worn by a person having an ostomy hernia, the clothing article is made for exerting compression (Column 3, lines 35 40) and is intended to be disposed around the lower portion of the body, the clothing article is characterized by knitting a seamless tubular (column 2, lines 66 67) which is made with an anatomic fit in a predefined size and shape and establishing a firm, elastic (Column 3, lines 26-28) structure. The device of Browder, Jr. is made on a body size circular knitting machine

(Column 2, lines 25 -26) and is selectively fixed on the machine form having a predetermined size and shape as the item is being constructed and is sewn together forming a panty brief with a lower body area, groin area and leg openings (Figures 1 and 2) after the garment has been fixated on a form. The extension of the garment is performed with varying intensity (Column 2, lines 30 -34) for establishing varied extension or elasticity and firmness in the article giving varied compression when the clothing article is placed on the body. Elastic yarns are formed along designated courses such that the elastic tension is even through out the garments and therefore would make up approximately 50% of the garment (Column 2, lines 25-29). It is noted that the recitation "for producing compression of between 15 to 5 mmHg" is a functional recitation. The device of Browder, Jr. meets all the structural limitations claimed by applicant and is therefore interpreted to perform in the same manner as the claimed apparatus having a compression of between 15 – 5 mmHg and would have a material that displays a force/elongation curve including a largely flat curve pattern as recited by applicant.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

10/544,094 Art Unit: 3765

5. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Browder, Jr. in view of Sinigagliesi (US 2,736,036). The device of Browder, Jr. substantially discloses the claimed invention but is lacking a groin area having an aperture. The device of Sinigagliesi discloses a tubular knit garment having an aperture (13) in the groin area. It would have been obvious to a person having ordinary skill in the art at the time the invention was made to modify the device of Browder, Jr. by utilizing the aperture taught by Sinigagliesi in order to provide access to the genitals from the exterior surface of the garment (column 2, lines 55 – 68).

Conclusion

- 6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 7. Binder (US 2,553,353), Parrott (US 3,174,482), Sloan (US 3220,410), Safut (US 3,595,034), Atwater et al. (US 5,131,100), Boehm et al. (US 5,163,306), Browder, Jr. et al. (US 5,572,888), Perron et al. (US 5,787,732), Rabinowicz (US 6,192,717) and Slautterback et al. (US 6,622,719).
